## TECHNICAL SKILL

- Programming Language: Core Java and C
- Basics of Networking (Switching & Routing)

## PROJECTS

### Major Project

- Title : TestMantra(Online test website build for our college)
- Summary : It is a website for any institute to give test to reduce manual effort. We use ms-access as back end and java as front end.

### Minor Project

- Title : Text to speech converter
- Summary : The application takes text as input and gives output in the form of voice by using java's API free TTS.

### Other Projects

- Title : Client project management & Tracking for an Enterprise
- Summary : It helps to manage information of customer and keep trace all requirements to develop a Software. We use VB.Net as front end and SQL server as back end.
- Title : Wide Area Network
- Summary : By using CISCO packet tracers try to build a model of WAN. I just create a simulation project for WAN.
